

Onsite Workplace COVID-19 Screening & Testing

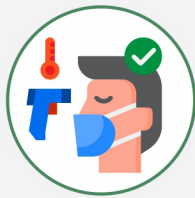

Americans want to feel safe at work

The CDC estimates that 35% of coronavirus patients don't have typical symptoms. Employers need a plan.

InOut Labs' employee screening process helps detect symptomatic and asymptomatic individuals.

SCREENING INCLUDES

Forehead temperature check

"Sniff Test" for sense of smell

Pulse Oximeter to check lung function

PCR Nasal Swab Test*

*We use a self-administered nasal swab, not the painfully uncomfortable nasopharyngeal swab. This one does not hurt.

FEES	
Minimum Participants Per Event	10
1-10 Participants	\$195.00 ea.
11-25 Participants	\$185.00 ea.
26-100 Participants	\$175.00 ea.

THE COST OF NOT TESTING

- 10-day quarantine
- Up to 2 Weeks Paid Leave (FFCRA)
- Lost Production
- Healthcare Expenses
- Workers Comp Claims
- Exposure to the Workforce (and their families)
- Risk of Shutdown

1. What's the turnaround time for test results?

- Most test results arrive in 2-3 days.

2. Can employers screen for COVID-19?

- The Equal Employment Opportunity Commission (EEOC) says "Yes."

3. Can COVID-19 testing be billed to our employees' health plans?

- No. Not legally as per FFCRA.

4. Can COVID-19 Antibody Tests be used for workplace screening?

- EEOC Confirms Employers Cannot Require Return to Work COVID-19 Antibody Tests.

5. What does the CDC recommend for workplace screening for COVID-19?

- Viral testing of workers without symptoms may be useful to detect COVID-19 early and stop transmission quickly.
